Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)
Office Action Summary	09/901,180	CZARNIK ET AL.
	Examiner	Art Unit
	Jonas N. Strickland	1754
The MAILING DATE of this communication a Period for Reply	ppears on the cover sheet with th	e correspondence address
A SHORTENED STATUTORY PERIOD FOR REP THE MAILING DATE OF THIS COMMUNICATION  - Extensions of time may be available under the provisions of 37 CFR after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a relif NO period for reply is specified above, the maximum statutory perions after the reply within the set or extended period for reply will, by state the period by the Office later than three months after the main earned patent term adjustment. See 37 CFR 1.704(b).	I. 1.136(a). In no event, however, may a reply be eply within the statutory minimum of thirty (30) bod will apply and will expire SIX (6) MONTHS figure, cause the application to become ABANDO	e timely filed days will be considered timely. om the mailing date of this communication. NED (35 U.S.C. § 133).
Status		
1) Responsive to communication(s) filed on 09	July 2001.	
	nis action is non-final.	
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is		
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.		
Disposition of Claims		
4)⊠ Claim(s) <u>1-15</u> is/are pending in the application	on.	
4a) Of the above claim(s) is/are withdrawn from consideration.		
5) Claim(s) is/are allowed.		
6)⊠ Claim(s) <u>1-15</u> is/are rejected.		
7) Claim(s) is/are objected to.		
8) Claim(s) are subject to restriction and	d/or election requirement.	
Application Papers		
9) The specification is objected to by the Exami	ner.	
10)⊠ The drawing(s) filed on <u>09 July 2001</u> is/are: a)⊠ accepted or b)□ objected to by the Examiner.		
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).		
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).		
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.		
Priority under 35 U.S.C. § 119		
12) Acknowledgment is made of a claim for foreign	an priority under 35 U.S.C. § 119	9(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:  1. ☐ Certified copies of the priority docume		(4)
2. Certified copies of the priority documents have been received in Application No		
<ol><li>Copies of the certified copies of the present the present</li></ol>		eived in this National Stage
application from the International Bure		
* See the attached detailed Office action for a li	ist of the certified copies not rece	ived.
Attachment(s)	A) []	on (DTO 412)

3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/0 Paper No(s)/Mail Date <u>2/03, 9/01</u> .		al Patent Application (PTO-152)

Application/Control Number: 09/901,180

Art Unit: 1754

## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.
  - 2. Ascertaining the differences between the prior art and the claims at issue.
  - Resolving the level of ordinary skill in the pertinent art.
  - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Application/Control Number: 09/901,180

Art Unit: 1754

4. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peter-Hoblyn et al. (US Patent 5,976,475).

Peter-Hoblyn et al. discloses a process and system for reducing nitrogen oxide emissions from a lean-burn internal combustion engine utilizing urea in aqueous solution. Peter-Hoblyn et al. continues to disclose wherein an injector system is used for fuel injection, which provides a constant feed to injectors and a return line. The feed and injection can be controlled to provide sufficient urea for nitrogen oxide reduction and sufficient cooling capacity for the feed and injection system (see abstract). Furthermore, Peter-Hoblyn et al. discloses wherein an atomizer is utilized and wherein it is known in the art to cool the injector and/or aid the injection of urea solution (col. 5, lines 34-45). Peter-Hoblyn et al. continues to disclose having at least about 25% urea concentration (col. 3, lines 6-10). With respect to claims 5 and 6, Peter-Hoblyn et al. discloses internal combustion engines and diesel engines (col. 3, lines 51-60). With respect to claim 15, Peter-Hoblyn et al. discloses wherein the critical temperature is below 140°C (col. 6, lines 40-45). It would have been obvious to one of ordinary skill in the art to continuously circulate a reagent below a critical temperature, because Peter-Hoblyn et al. discloses wherein the importance of maintaining a proper cooling temperature with respect to the injector and the reagent solution, urea.

## Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonas N. Strickland whose telephone number

Application/Control Number: 09/901,180

Art Unit: 1754

Page 4

is 571-272-1359. The examiner can normally be reached on M-TH, 7:30-5:00, off 1st Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley Silverman can be reached on 571-272-1358. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
